EVALUATION OF CALYPTE HIV-1 URINE ASSAY TEST KIT

This is in reference to the above HIV-1 Urine Assay test kit which was submitted to the National AIDS Control Programme (NASCOF) of the Ministry of Health for evaluation.

The results of the evaluation show that the kit is of acceptable quality and satisfies the requirements for sensitivity and specificity for HIV test kits for use in Kenya.

The test kit is therefore accepted and certified for use in Kenya for HIV-1 Antibody testing in urine.
