FORWARD LOOKING STATEMENTS

This Site contains forward-looking statements. Forward-looking statements include, but are not limited to, statements that express our intentions, beliefs, expectations, strategies, predictions or any other statements relating to our future activities or other future events or conditions. These statements are based on current expectations, estimates and projections about our business based on currently available information and assumptions made by managements. Although we believe that the assumptions on which the forward-looking statements contained herein are based on reasonable assumptions, any of those assumptions could prove to be inaccurate given the inherent uncertainties as to the occurrence or nonoccurrence of future events. These statements are not guarantees of future performance or results. Known and unknown factors could cause actual performance or results to be materially different from those expressed or implied in these statements. Some of these factors are: ability to market products; impact of competitors, competing products and technology changes; ability to develop, commercialize and market new products; market acceptance of our products; ability to fund research and development and other projects and operations; ability to obtain and the timing of obtaining necessary regulatory approvals; ability to develop product distribution channels; ability to enter into international manufacturing agreements; obstacles to international marketing and manufacturing of products; ability to sell products internationally; loss or impairment of sources of capital; exposure to product liability and other types of litigation; changes in international, federal or state laws and regulations; changes in relationships with strategic partners and reliance on strategic partners for the performance of critical activities under collaborative arrangements; changes in accounting practices or interpretation of accounting requirements; equipment failures and ability to obtain needed raw materials and components; the impact of terrorist attacks and civil unrest; and general political, business and economic conditions. These and other factors are discussed more fully in our latest Securities and Exchange Commission filings, including our most recent Annual Report on Form 10-K and Quarterly Report on Form 10-Q. Although forward-looking statements help to provide information about future prospects, you should keep in mind that forward-looking statements may not be reliable. The forward-looking statements are made as of the dates indicated in the Site and Calypte undertakes no duty to update these statements.
